Designing, Marketing, & Administering  
Comprehensive Student Insurance Plans  
for over 40 Years!**

# INSURANCE FOR STUDENTS

---

Insurance for Students is a leader in providing Colleges, Universities and K-12 schools with Student Health and Accident Insurance Solutions. We are proud of our role and contributions to the evolution and ongoing success of the many student health insurance plans we have designed and overseen since we first began direct service to the college and university marketplace in 1978. Our mission has been to deliver optimal value and service to student insurance programs by combining the following two primary functions:

- Assist the College/University to design the program that best meets their institution's specific objectives, select the carrier that represents the best value (cost versus benefits), negotiate the most favorable terms.
- Implement, Administer, and Service the program daily to ensure smooth operation, high customer satisfaction and long-term plan success.

**We recognize that each institution is unique and flexibility is vital to our success**
